Glossary

Most Similar Group (MSG)	Are groups of CSP areas that have been found to be the most similar to each other based on an analysis of demographic, social and economic characteristics which relate to crime. Each CSP area has its own group of CSP areas to which it is 'most similar'.
Multi agency risk assessment conference (MARAC)	Monthly multi agency meeting to discuss high risk / repeat cases of domestic abuse.

Introduction

Partnership Delivery Board 3 aims to make Wrexham a place where people are safe and feel included. This delivery plan addresses local needs and reflects the direction that is given by the North Wales Safer Communities Board (NW SCB) Plan. The Board takes the lead from the Police and Crime Commissioner's plan, which is informed by the North Wales strategic assessment carried out by police analysts.

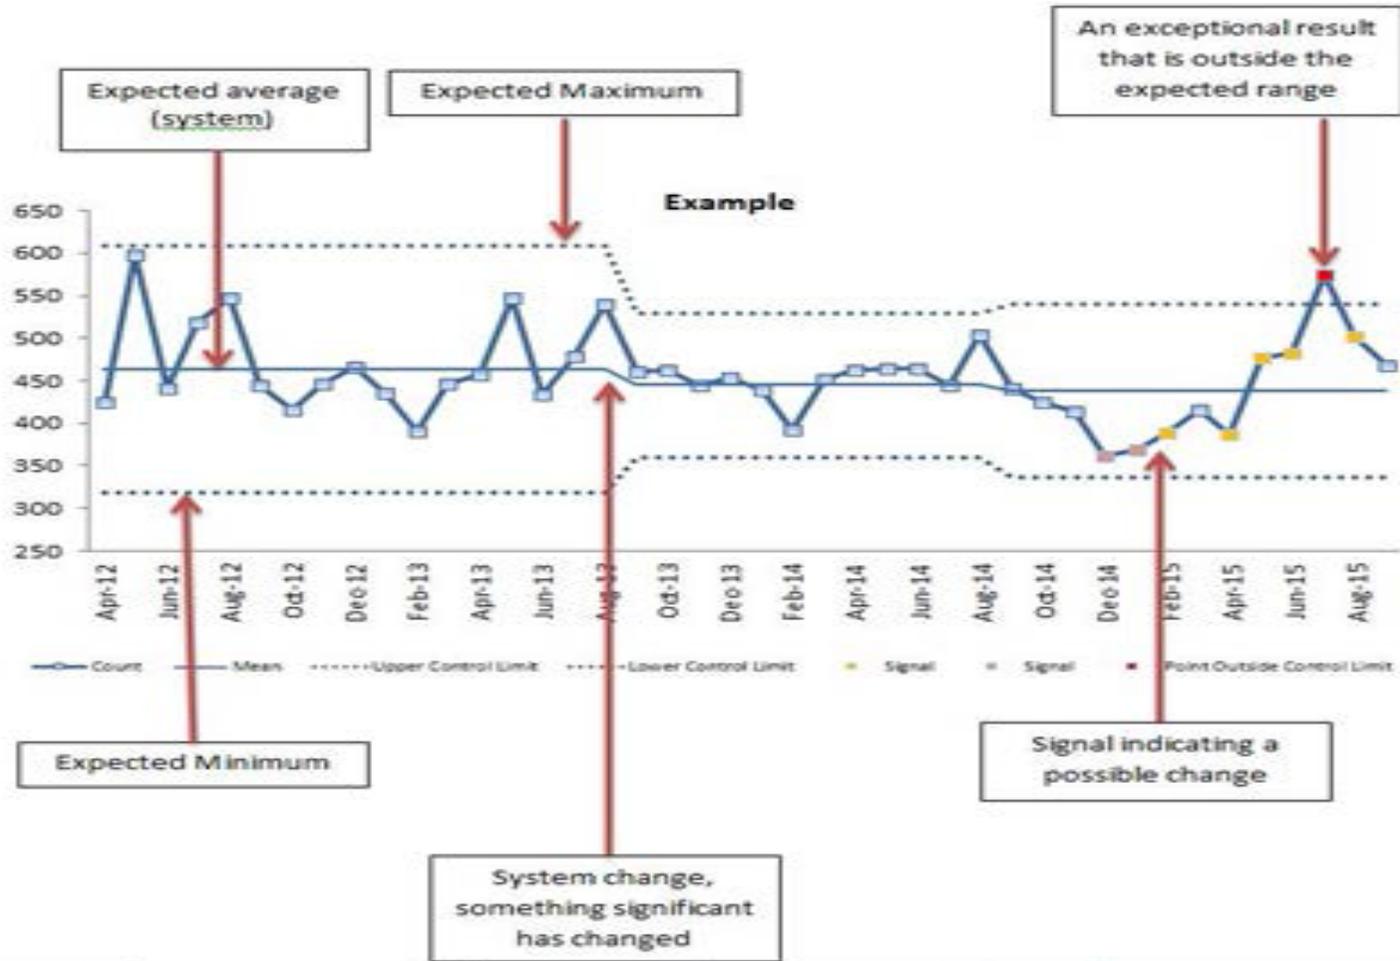

As a Board we work in partnership to make a difference to the people of Wrexham so that they "are safe", "feel safe" and "feel included". Our plan has clear priorities which have been informed by strategic needs assessments. It is vital that we work in partnership to maintain the links with our local communities and to be able to respond to crime and anti-social behaviour. We also need to be able to listen to what local communities and other partners are telling us about Wrexham. This partnership works on priorities that require a multi-agency approach and cross organisational working to make a difference to Wrexham.

Chair of PDB3

Interpreting SPC (Statistical Process Control) Charts

North Wales Police

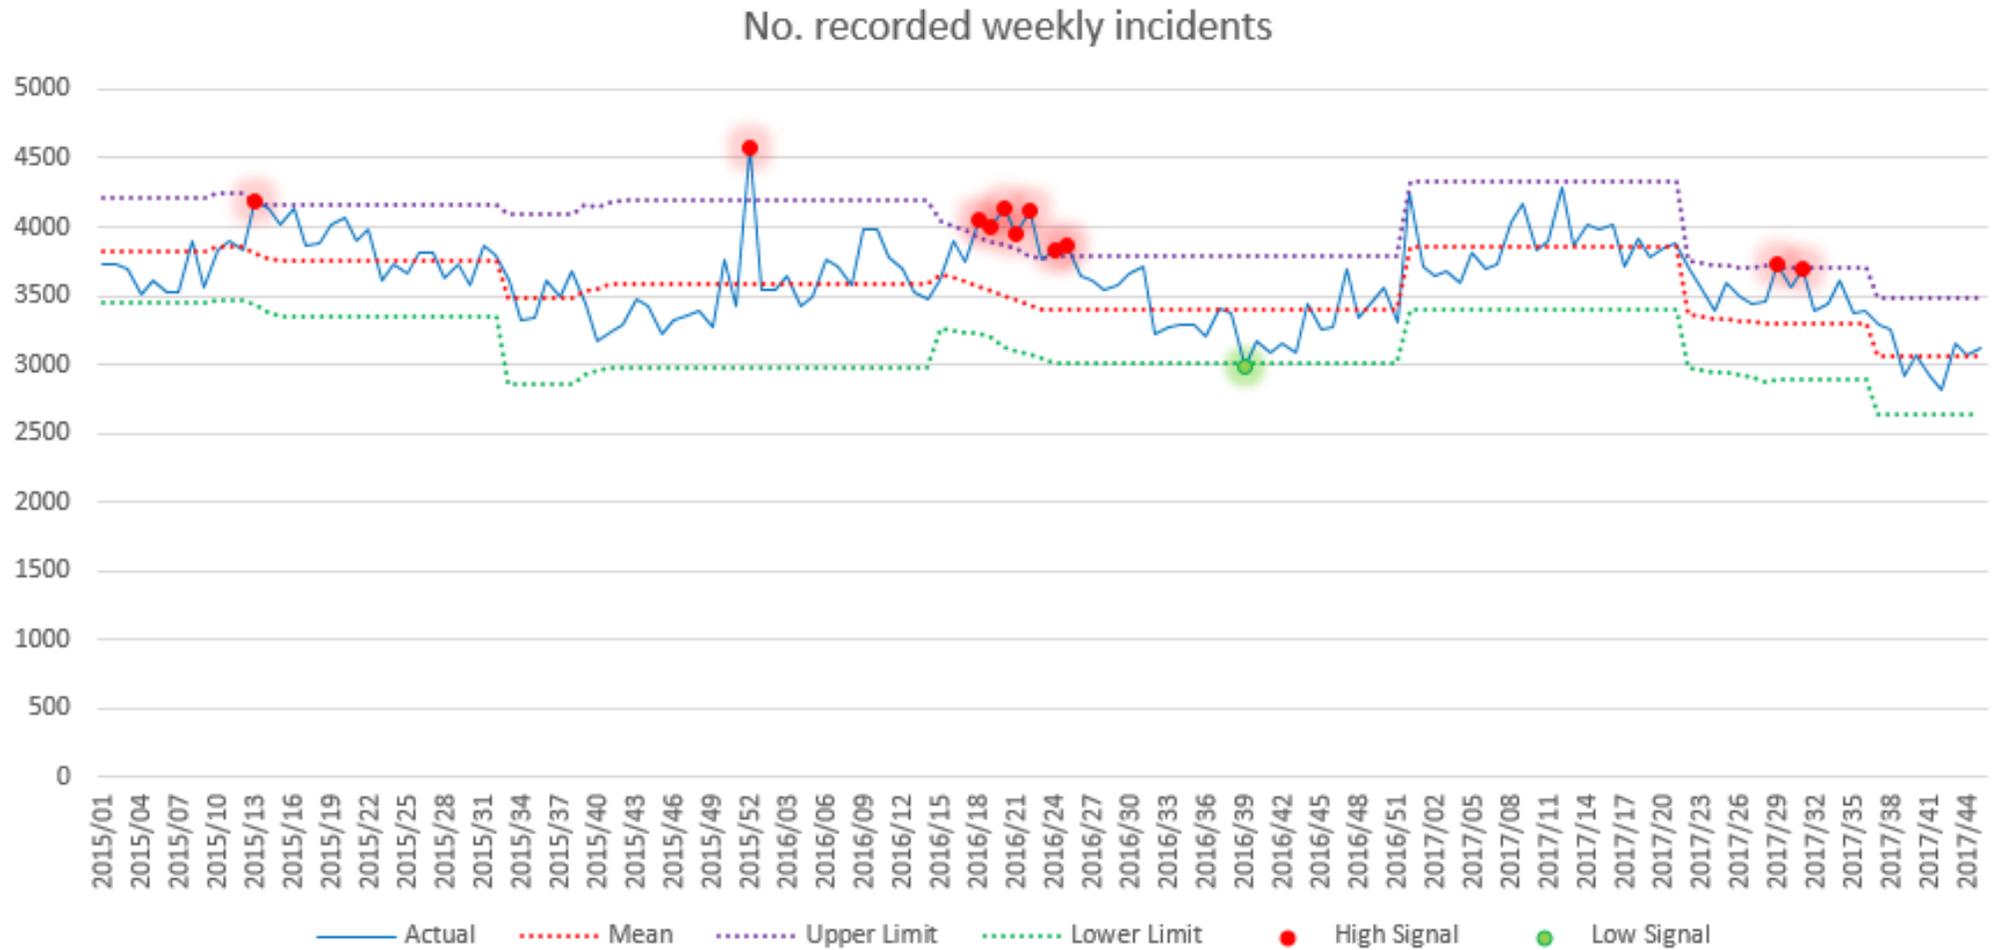

Recorded crime has increased by 24% in 2017/18 compared to the previous year.

Analysis has evidenced that this is an increase in *crime recording effectiveness* rather than an increase in offending. The improvement in recording crime is linked to the increased emphasis on THRIVE from February 2017 which matches the timing of the increase in recorded crime.

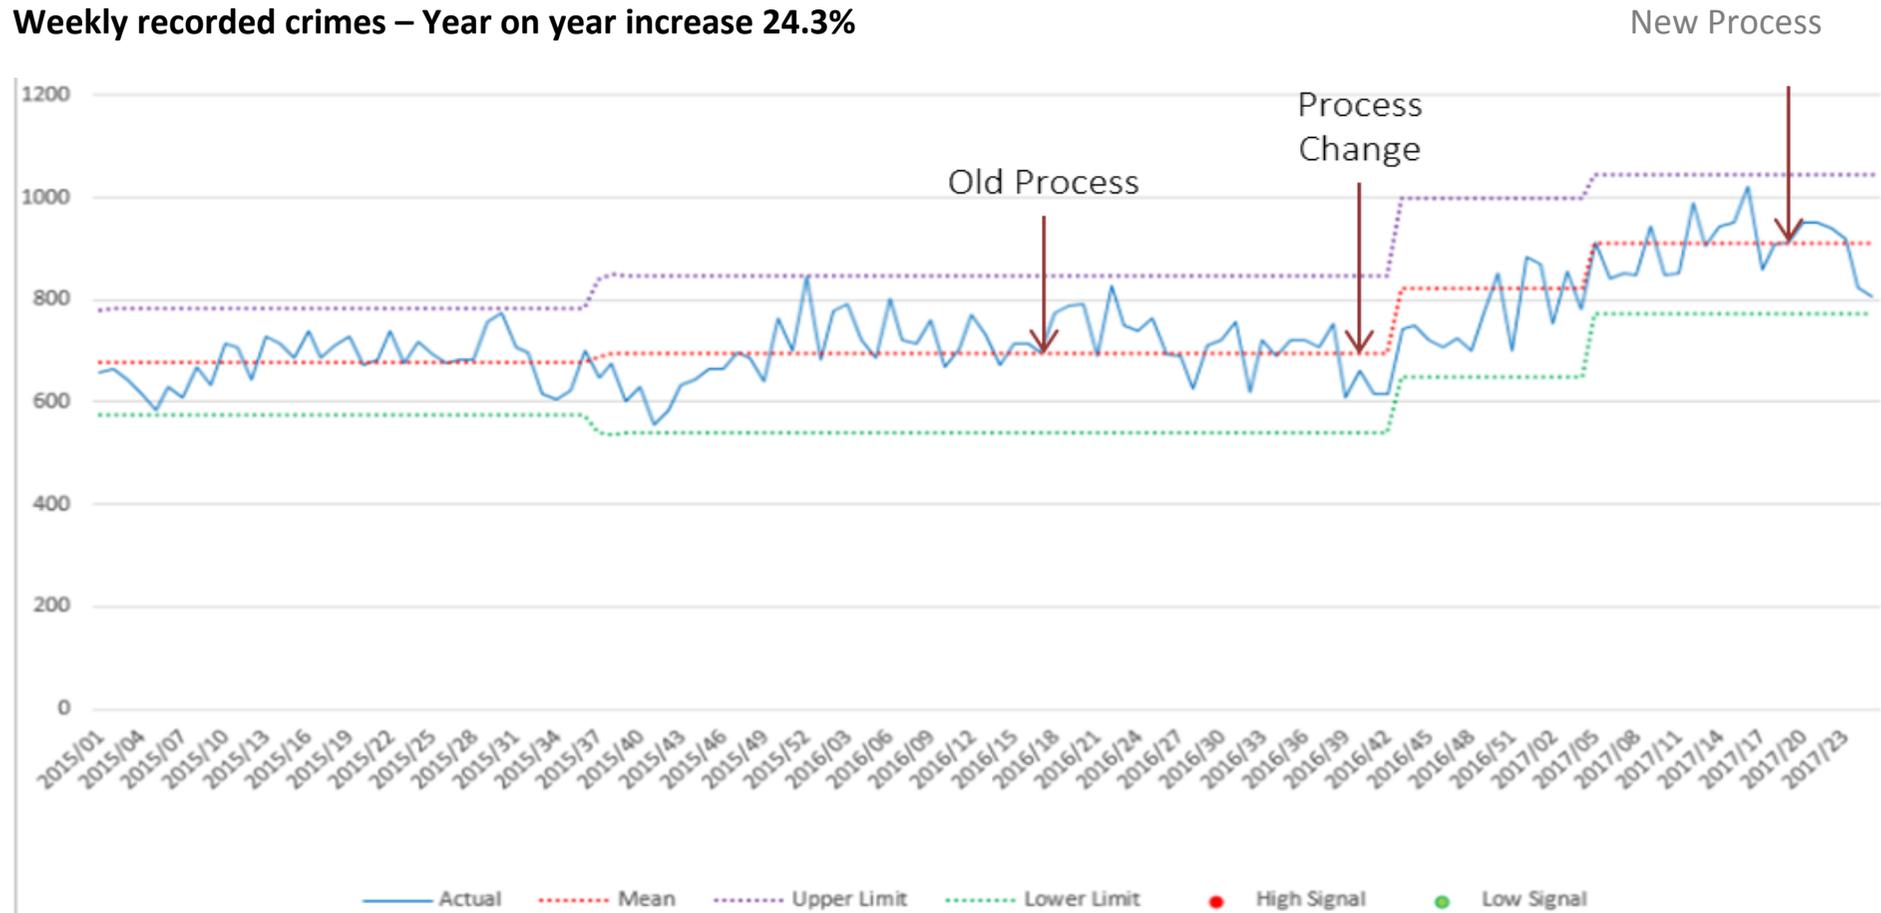

THRIVE is a risk management tool which considers six elements (Threat, Harm, Risk, Investigation, Vulnerability and Engagement) to assist in identifying the appropriate incident response grading for all events, based on the needs of the caller and the circumstances of the incident. It allows the organisation to respond and service callers/victims based on an initial assessment of Threat/Risk/Harm or vulnerability and not solely on the type of incident/crime they report.

The overall number of calls from the public and the number of incidents (crime and non-crime) dealt with by the police has increased a small amount; however, the number of crimes being recorded has increased a lot.

Weekly incidents (crime and non-crime) – Year on year increase 0.2%

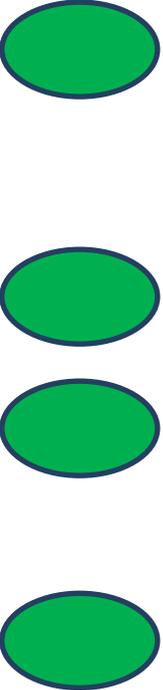

Weekly recorded crimes – Year on year increase 24.3%

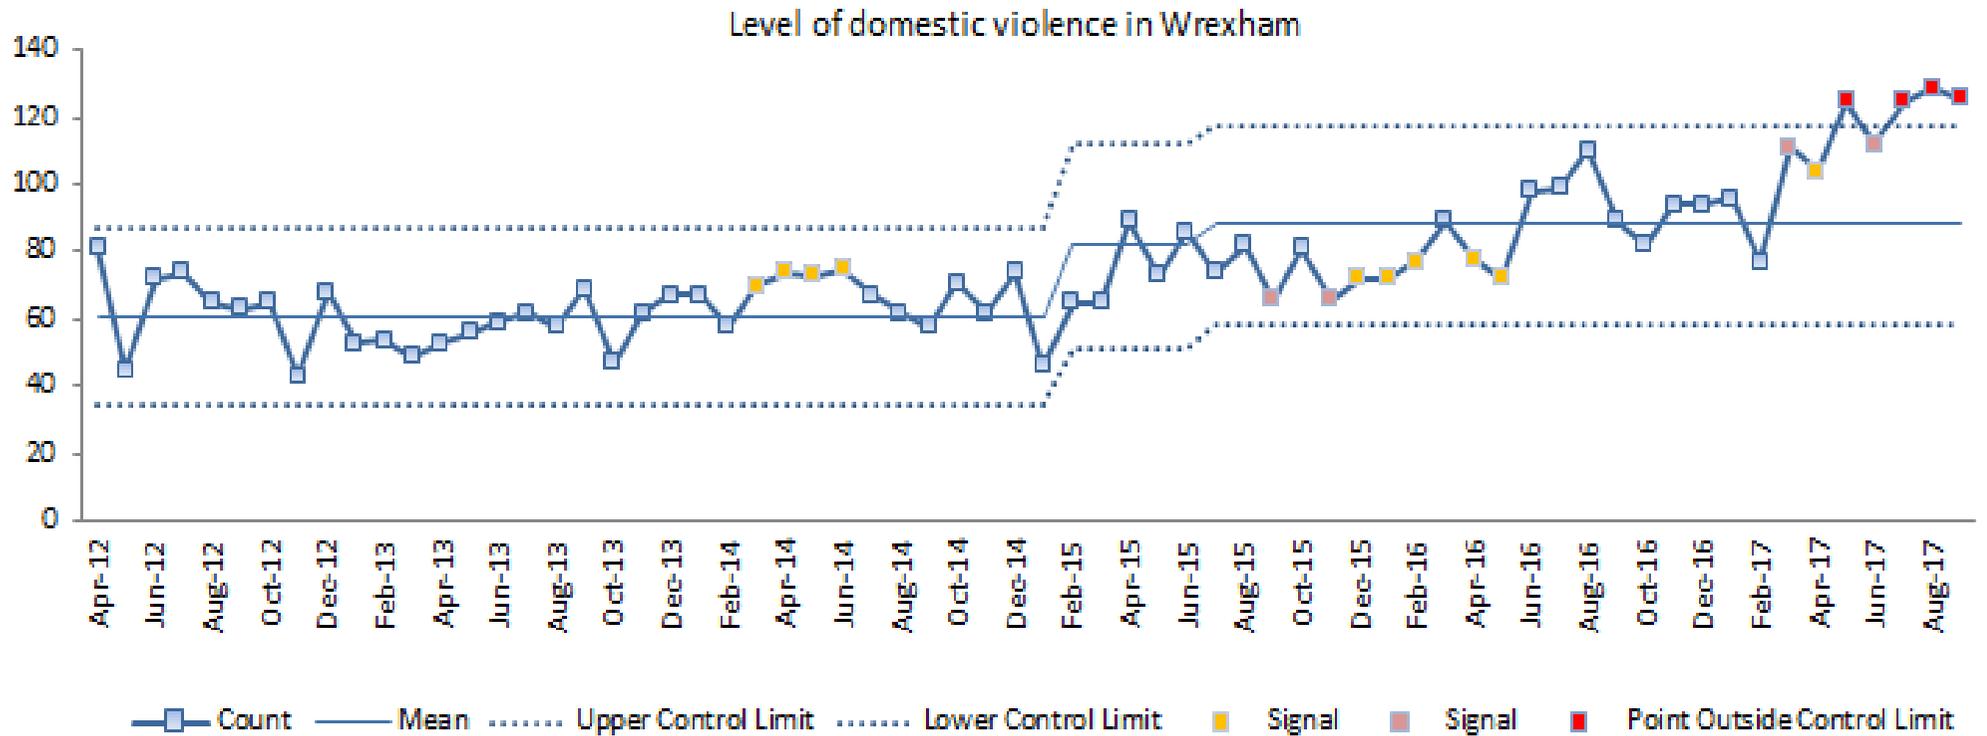

This indicates that the ratio of crimes created to calls received has increased because of the more effective assessment of the incidents. National trends reflect similar increases in recorded crime levels with improved data integrity and efficient crime recording being emphasised nationally.

SPC Chart Domestic Violence

Domestic violence includes all violent crime which has been tagged as domestic due to the relationship between the victim and the offender.

The level of domestic violence is increasing in Wrexham with high signals in each of the past seven months. With a national focus on crime recording integrity, changes in the recording of victim based crime have had a particular impact on domestic related offences.

SPC Chart for Repeat Incidents of Domestic Abuse

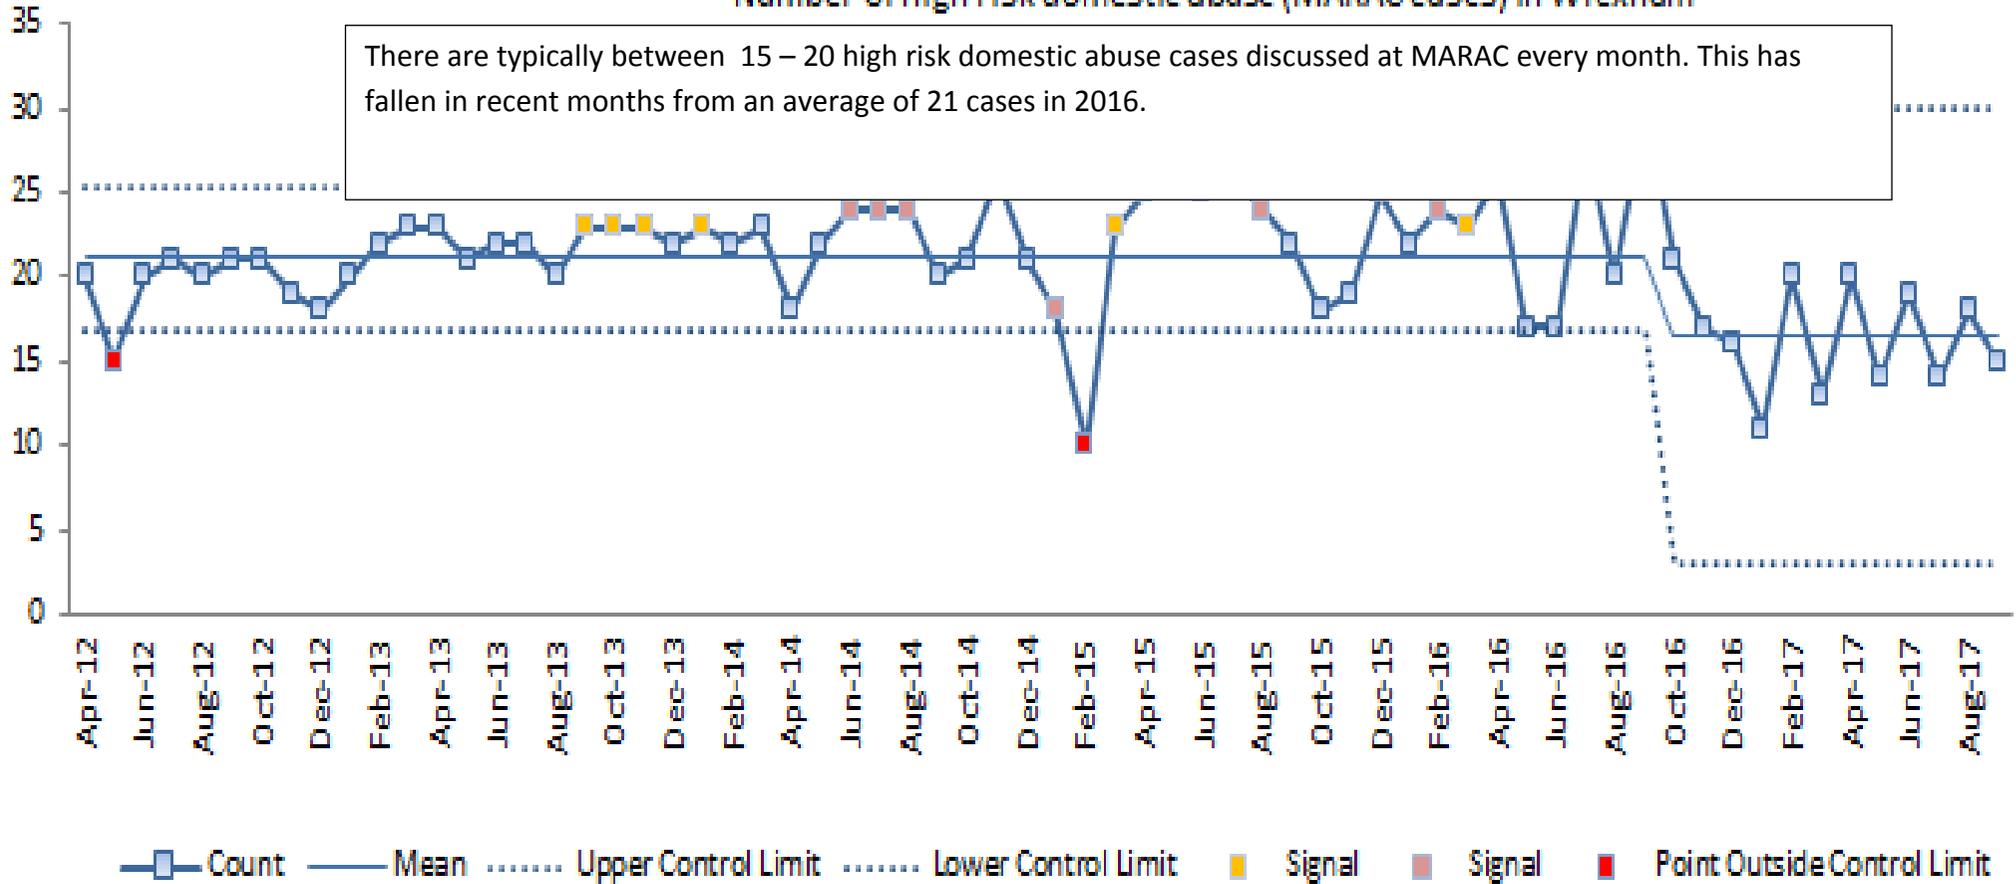

Domestic violence includes all violent crime which has been tagged as domestic due to the relationship between the victim and the offender. Repeat victims are people who have been a victim of two or more crimes in 12 months, therefore the value for each month is a snapshot of the previous 12 months.

There were 167 repeat victims of domestic violence in Wrexham for the 12 months ending June 2017, an increase from 127 at the same point in 2016. There are likely to be further increases in the coming months. A number of factors are believed to have contributed to this increase, including changes in recording/reporting processes and improved referrals procedures from partner agencies that have generated additional crimes from which repeat victims have been identified.

SPC Chart for High Risk Domestic Abuse

Number of high risk domestic abuse (MARAC cases) in Wrexham

There are typically between 15 – 20 high risk domestic abuse cases discussed at MARAC every month. This has fallen in recent months from an average of 21 cases in 2016.

			was also identified in the Wellbeing Assessment which has informed the development of the Wellbeing Plan.	
<p>7e) Implement the Town Centre Action Plan for Wrexham</p> <p>7e)</p> <p>LEAD – PDB3 Chair and Senior PIPS Officer</p>	<ul style="list-style-type: none"> ➤ Levels of ASB reduce in the town centre ➤ The most vulnerable in our community are supported. 	Ongoing	<ul style="list-style-type: none"> ➤ Strategic group established to oversee and direct work ➤ Increased outworker provision (2 to 4) ➤ Increased Enforcement Officer provision (1 to 2) ➤ Recruitment of 2 SIA registered security officers (bus station) ➤ Recruitment of 3 harm reduction assertive outreach workers. ➤ Weekly Providers meeting to discuss individuals and prioritise action. ➤ Weekly triage café ➤ Rapid referral process for treatment agreed with BCUHB ➤ North Wales Police deploying additional resources in key areas of town centre ➤ If individuals are refusing to engage, then where appropriate, criminal proceedings will follow “Assertive Recovery” via the courts. ➤ Communication Strategy agreed to reassure the public. ➤ Keep in touch meetings with Members 	

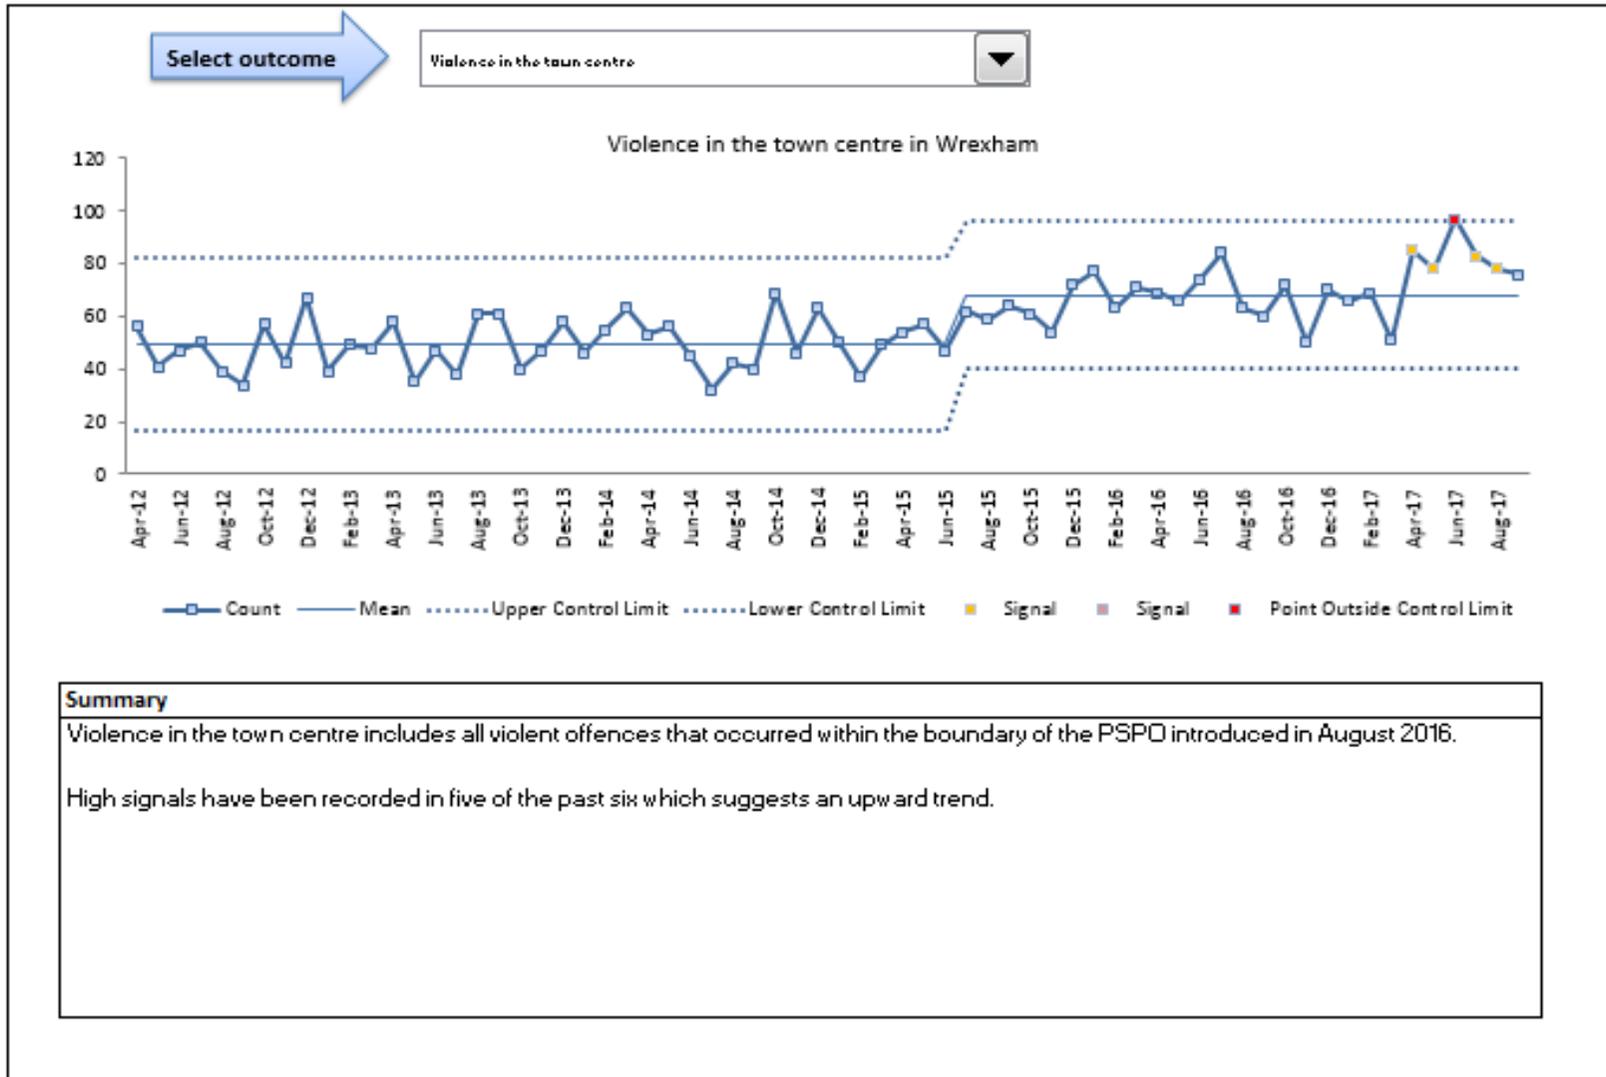

SPC Chart - Reduce ASB in Town Centre

For the purposes of this report, the town centre is defined by the boundary of the PSPO introduced in August 2016.

There are, on average, 148 ASB incidents reported in the town centre every month, which has increased from 110 a month in 2016. Around 30% of all ASB in Wrexham county is reported in the town centre.
